**Abstract of JP2001309329**

**PROBLEM TO BE SOLVED:** To provide a receiver capable of outputting abundant still picture data subjected to copyright protection according to the use of still picture secondary utilization. **SOLUTION:** These broadcasting system and receiver can output the still picture data subjected to the copyright protection corresponding to the use by constructing a system in which still picture output control information is multiplexed to a transmission signal, a receiver extracts still pictures from moving pictures, the still picture data to be outputted can be processed and charging in each processing type can be set.
